C. Reference/ Learning Commons (VK/VH/KS)

- Desk Statistics: Fall Quarter
Fall (September 29-December 12, 2014) is the first quarter we used LibAnalytics to collect statistics. The forms were essentially the same as in Desk Tracker, but two question types were added: Office Supplies and Library Policies/Operations. These had previously been recorded as “Other” in the old forms so do not impact the three required categories: (Directional, Technical, and Reference/Research).

The following is a cross-tabulation between question type and patron type:

<table>
<thead>
<tr>
<th>Question Type</th>
<th>Student</th>
<th>Faculty/Staff</th>
<th>E-Campus Student</th>
<th>OSU (type unknown)</th>
<th>Public/Community</th>
<th>Unknown</th>

</tbody>
</table>

Chat/Email Statistics
These are the total number of transactions handled by the librarians monitoring the chat reference (these are handled off-desk in a separate queue):

<table>
<thead>
<tr>

Because it is important to track how many of these questions come via chat and how many via email (or other sources) here is a cross-tab breaking these down by patron type:

<table>
